PRINTED FOR HIS MAJESTY'S STATIONERY OFFICE,

By WYMAN AND SONS, LIMITED, 109, FETTER LANE, E.C.

And to be purchased, either directly or through any Bookseller, from
WYMAN AND SONS, LIMITED, 109, FETTER LANE, FLEET STREET, E.C.; and
32, ABINGDON STREET, WESTMINSTER, S.W.; or
OLIVER AND BOYD, TWEEDDALE COURT, EDINBURGH; or
E. PONSONBY, 116, GRAFTON STREET, DUBLIN.

1908.

[Cd. 4264.] Price 8½d.

SALE OF GOVERNMENT PUBLICATIONS.

The under-mentioned Firms have been appointed sole Agents for the sale of Government Publications, including Parliamentary Reports and Papers, Acts of Parliament, Revised Office Publications, &c., &c. (with the undermentioned exceptions), and all such works can be purchased from them either directly or through retail booksellers, who are entitled to a discount of 25 per cent. from the published prices:—

IN ENGLAND:—Messrs. WYMAN AND SONS, LTD., Fetter Lane, E.C.
IN SCOTLAND:—Messrs. OLIVER AND BOYD, Tweeddale Court, Edinburgh.
IN IRELAND:—Mr. E. PONSONBY, 116, Grafton Street, Dublin.

Hydrographical Works of the Admiralty are sold by Mr. J. D. POTTER, 145, Minorics, E.C. Patent Office Publications are sold at the Patent Office. (Classified Abridgments of Patent Specifications are sold also by Wyman & Sons, Ltd.)

The Publications of the ORDNANCE SURVEY and of the GEOLOGICAL SURVEY can be purchased from Agents in most of the chief towns in the United Kingdom, through any Bookseller, or from the Director-General of the Ordnance Survey, Southampton, or, in the case of Ireland, from the Superintendent, Ordnance Survey, Dublin. In addition, Small Scale Maps are, as a rule, procurable at Railway Bookstalls in England and Wales.

The Journal of the Board of Agriculture is published monthly by the Board, at 4, Whitehall Place, S.W. Prior to April, 1907, it was published by Messrs. Loughton and Co., Ltd., 3, Wellington Street, Strand, W.C. Price 4d.

The following is a list of some of the more important Parliamentary and Official Publications recently issued:—

Statutes—

Public General Acts, 1906. In separate chapters, at varying prices.

Local and Personal Acts, 1906, 3d. per 4 pp.

Public General, Session 1907. With Index, Tables, &c. Cloth. 2s.

Second Revised Edition. 1235-1886. XVI Vols. 7s. 6d. each.

Statutes in Force. Chronological Table and Index of. 23rd Edition. To the end of the Session 7 Edward VII. (1907). 2 Vols. 10s. 6d.

Acts of the Parliaments of Scotland, 1424-1707. Revised Edition. 2s.

Statutory Rules and Orders other than those of a Local, Personal, or Temporary Character. Issued in 1890 to 1907. 10s. each.

Statutory Rules and Orders revised, in force on Dec. 31, 1903. Vols. I. to XIII. 10s. each.

Statutory Rules and Orders in force on 31st December, 1906. Index to. 1s.

VOTES AND PROCEEDINGS OF THE HOUSE OF COMMONS, as issued, 1d. per 8pp.

MINUTES OF PROCEEDINGS OF THE HOUSE OF LORDS, as issued, 1d. per 4pp.

HISTORICAL MANUSCRIPTS. Reports of the Royal Commissioners. In course of issue.

ROYAL COMMISSIONS. Evidence, in separate parts:—Canals; Mines; Irish Railways;

Shipping Rings; Whiskey.

[Cd. 3637.] SANATORIA FOR CONSUMPTION, AND CERTAIN OTHER ASPECTS OF THE TUBERCULOSIS QUESTION. 10s. 2s.

[Cd. 3719.] CANALS AND WATERWAYS. Royal Commission. History, Extent, Capital, Traffic. 7s. 2s.

[Cd. 3951.] LICENSING STATISTICS, 1907. Operation of the Laws. 2s. 2s.

[Cd. 3992.] TROPICAL DISEASES RESEARCH FUND. Report of Advisory Committee, 1907. 1s. 11d.

[Cd. 3997.] BRITISH COTTON CULTIVATION IN BRITISH POSSESSIONS. 2s.

[Cd. 4027, 4028.] IRISH FORESTRY. Report of Departmental Committee, with Evidence, &c. 4s. 11d.

[Cd. 4068, 4069.] BANKRUPTCY LAW AMENDMENT DEPARTMENTAL COMMITTEE. Report, Evidence, &c. 2s. 2s.

[Cd. 4081.] SECOND PEACE CONFERENCE, HELD AT THE HAGUE, 1907. Protocols. 4s. 2s.

[Cd. 4097.] CONGESTION IN IRELAND. Royal Commission. Final Report. 2s. 2s.

MINES AND QUARRIES. Inspectors' Reports, 1907. In course of issue.

Trade and Commerce, &c.:—

[Cd. 3864.] COST OF LIVING OF THE WORKING CLASSES. Report on Rents, Housing, Retail Prices, Rates of Wages, &c. 6s.

[Cd. 3893.] STATISTICAL ABSTRACT OF THE BRITISH EMPIRE. 1892-1906. 1s. 1d.

[Cd. 3691.] Do. do. UNITED KINGDOM. 1892-1906. 1s. 1d.

[Cd. 3707.] Do. do. COLONIES. 1892-1906. 1s. 1d.

[Cd. 3724.] Do. do. BRITISH INDIA. 1896-1897 to 1905-1906. 1s. 1d.

[Cd. 4100.] TRADE OF THE UNITED KINGDOM, 1907. Vol. I. 5s. 7d.

[Cd. 3990.] LABOUR STATISTICS, UNITED KINGDOM. 11th Abstract, 1905-06. 1s. 2s.

[Cd. 1761, 2337, 2669.] BRITISH AND FOREIGN TRADE AND INDUSTRIAL CONDITIONS. Memoranda, Tables and Charts. 7s.

[Cd. 3969.] EAST INDIA. Trade. Tables 1902-3 to 1906-07. 1s. 6d.

[Cd. 3870, 3989.] AGRICULTURAL RETURNS—GREAT BRITAIN. 1907. Parts I. and II. 6d.

[Cd. 3639.] BRITISH TRADE IN AUSTRALIA. CONDITIONS AND PROSPECTS. Report. 11d.

[Cd. 3708.] COLONIAL IMPORT DUTIES. 1907. 2s. 6d.

[Cd. 3788.] VOLUNTARY CONCILIATION AND ARBITRATION BOARDS AND JOINT COMMITTEES. Report on Rules of. 1s. 6d.

BOARD OF AGRICULTURE AND FISHERIES.

AGRICULTURAL STATISTICS, 1907. PART III.

REPORT TO THE SECRETARY OF THE BOARD OF AGRICULTURE AND FISHERIES.

SIR,

I beg to submit Part III of the volume of the Agricultural Statistics for 1907, which contains information relating to Prices of Agricultural Products, supplies of Live Stock at Markets, and Imports and Exports of Agricultural Commodities.

THE COURSE OF PRICES.

Before referring specially to the prices of agricultural commodities during 1907 it may be useful to glance at the general course of prices of some of the chief food products in which British farmers, as well as consumers, are mainly interested. Confining attention to Wheat, Meat, Cheese and Butter, for which fairly comparable returns are available, and taking quinquennial averages commencing with 1871-5, it appears that the period when these kinds of food were cheapest was in 1896-1900. Taking the average prices of 1871-5 as 100, the average prices in 1896-1900 would be represented as follows: Wheat 52, Beef 68, Mutton 79, Bacon 80, Cheese 79, Butter 92. In the next quinquennium the percentages as compared with 1871-5 were in the case of Wheat 51, Beef 71, Mutton 84, Cheese 86, and of Butter 94, while in the case of Bacon there was an increase of 7 per cent. over the level of 1871-5.

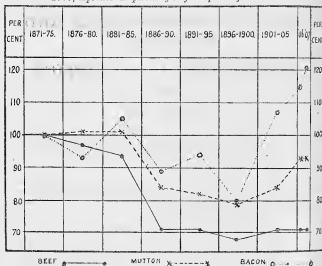

Taking the two last years singly, and comparing them with the preceding quinquennium and with 1871-5, the prices appear as follows:—

—	Wheat.	Beef.	Mutton.	Bacon.	Cheese.	Butter.
1871-5	100	100	100	100	100	100
1901-5	51	71	84	107	86	94
1906	52	71	93	115	99	99
1907	56	71	93	121	100	97

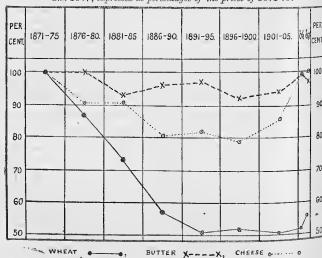

It will be seen therefore that in 1907 Bacon was 21 per cent. above the level of the datum period, cheese was at the same price, while Butter was only 3 per cent. and Mutton 7 per cent. below. The most substantial reductions in price level were for Wheat and Beef.

The changes during the whole period since 1871-5 can be shown graphically as in the following diagrams, the first relating to Meat—

A.—Prices of Beef, Mutton, and Bacon, 1871-75 to 1901-05, and 1906 and 1907, expressed as percentages of the prices of 1871-75.

B.—Prices of Wheat, Butter, and Cheese, 1871-75 to 1901-05, and 1906 and 1907, expressed as percentages of the prices of 1871-75.

Beef, Mutton and Bacon respectively—and the second to Wheat, Butter, and Cheese. It should be explained that the prices for Wheat are calculated from the returns under the Corn Returns Act, those for Beef and Mutton from the prices at the Metropolitan Market, and those for Bacon, Cheese and Butter from the declared values of imports.

PRICES OF CORN AND BREAD IN 1907.

For the first time since 1898 the average price of Wheat exceeded, in 1907, 30s. per quarter, while Barley and Oats were higher than in any year since 1902. The averages were as follows:—Wheat, 30s. 7d; barley, 25s. 1d; oats, 18s. 10d. per quarter, and the rise as compared with 1906 amounted to 2s. 4d., 11d. and 6d. per quarter respectively.

As the prices ruling in 1907 were higher, not only than in 1906, but also than in 1900, the septennial average was raised, and the value of £100 of Tithe Rent-Charge increased by nearly 11s. It is now a quarter of a century since the value of Tithe Rent-Charge stood above par, and during the 72 years since the commutation, the mean of the septennial averages represents a sum nearly 7 per cent. less than the commuted value.

The year opened with the price of wheat at 26s. per quarter, from which it rose gradually to 27s. in the first week of May. A considerable increase then followed, and during June and July the range of price was between 31s. and 33s. In August the rise continued, and at the end of the month the level of 33s. 10d. was reached; while after a temporary check in September, the price ran up rapidly for seven weeks until 36s. 3d per quarter was reached in the first week of November. Prices then slowly declined, but at the close of the year the average was still as high as 34s. 6d. per quarter. The price of barley at the beginning of the year stood at 23s. 11d. per quarter, and for the following six months it fluctuated between 23s. and 25s. When harvest commenced, the average rose gradually to 27s. 8d. at the middle of November, and fell again to 26s. 10d. by the end of December. The average for oats was 17s. 3d per quarter at the beginning of 1907, and rose steadily until a maximum of 21s. 3d. was attained in August, when supplies were scarce. The price then fell to 17s. 6d. at mid-September, but rose again to 18s. 10d. in November, falling away gradually to 18s. when the year closed.

From the table of corn prices at Edinburgh it would appear that the rise in prices was more pronounced north of the Border. The average prices per quarter returned for London and Edinburgh in the two years 1907 and 1906 were as follows:—

	Wheat.		Barley.		Oats.	
	1907.	1906.	1907.	1906.	1907.	1906.
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
London - -	31 7	29 3	25 8	24 7	19 6	18 9
Edinburgh -	30 11	29 2	26 5	25 5	22 6	20 10

By the courtesy of the Clerk of Teinds, I am able to include a full statement of the Fairs Prices struck in each county of Scotland for 1907 (Table LII). The system adopted by the different Fairs Courts is so diverse that comparisons as between one county and another are

not very reliable from a statistical point of view, but an attempt has been made in Table LIII. to bring together the prices of wheat, barley, oats, and oatmeal in each county so as to present a convenient summary of local prices for the whole of Scotland.

The quantities returned in England and Wales, under the Corn Returns Act, 1882, as sold during 1907, show an increase of 38,746 quarters of wheat, 106,526 quarters of barley, and 362,329 quarters of oats. Nearly one half of the increase in the quantities of oats returned is due to the marketing, in the last four months of 1907, of 738,156 quarters as against 583,316 quarters in the same period of 1906, in the 190 towns from which returns are received.

Some idea of the relative importance of the chief markets from which returns of purchases of British corn are received may be gathered from the following table, in which the markets returning the largest quantities are arranged in the order of the average annual quantity (in thousands of quarters) returned during the ten years 1898-1907:—

	Wheat Markets.	Quantity.	Barley Markets.	Quantity.	Oats Markets.	Quantity.
1	Norwich . .	129	Norwich . .	279	London . .	87
2	Peterborough .	108	Lincoln . .	204	Peterborough .	49
3	London . .	103	Berwick . .	127	Spalding . .	36
4	Hull . .	91	Lynn . .	105	Lincoln . .	34
5	Chelmsford . .	86	Ipewich . .	103	Wisbech . .	32
6	Lincoln . .	82	Newark . .	99	Norwich . .	32
7	Cambridge . .	74	Bury St. Edmunds .	94	Berwick . .	26
8	Colchester . .	62	Peterborough .	73	Boston . .	23
9	Boston . .	60	Barton . .	70	Lynn . .	22

Corresponding to the enhanced value of wheat at the end of 1907, there was an advance in the price of bread in Great Britain, as indicated in Table LVI. compiled from data published by the Board of Trade. The average price of the 4lb. loaf was, in December, about $\frac{1}{2}$ d. above the average price at the same period of 1906.

PRICES OF LIVE STOCK.

The price of Fat Cattle was distinctly higher in 1907 than in 1906 or 1905. The returns under the Weighing of Cattle Act (Table LIX.), representing the actual price per cwt. of beasts weighed alive, show an average for Great Britain of 33s. 8d., as compared with 32s. 11d. in each of the two previous years.

The information published in the Board's Weekly Return of Market Prices has now been collected for four years; and, in addition to Table LX., shewing the average prices month by month of different kinds of fat stock in Great Britain, a new Table (LXI.) has been compiled, exhibiting a four years' comparison of the annual prices. It will be seen that Polled Scots, Shorthorns, Hornfords and Devons were all returned as dearer in 1907 than in the three earlier years.

The monthly fluctuations in the price of Store Cattle are shown in Table LXII., and a new Table (LXIII.) has been added, shewing the average prices of this class of stock in the past three years. While these figures can hardly be regarded as of the same comparative value as these for fat stock, since the price varies more widely, according to the age of the animal and the seasonal conditions, it is satisfactory to note that the prices are mostly higher than in 1906, although there is naturally considerable variety in the price-changes recorded.

The price of fat sheep, was fairly maintained in 1907. First quality Downs and Crossbreds in England made about $\frac{1}{2}$ d. per lb. more than in 1906, and Longwools remained at the level; in Scotland however, no advance was indicated, and Blackfaced were cheaper.

Fat pigs declined steadily during the year, after a small rise in the first quarter in the price of bacon pigs. The average price of bacon pigs of first quality for the year in England was 6s. 8d. per stone, comparing with 6s. 11d. per stone in 1906, and 6s. 5d. in 1905. In Scotland, the average was 6s. 4d. per stone in 1907, 6s. 8d. in 1906, and 6s. 5d. in 1905.

MILK PRICES.

In the autumn of 1907 arrangements were made for returns from Reporters appointed by the Board of the wholesale prices of milk at London, Birmingham, Manchester, and Glasgow, and these have been summarised in Table LXIV., which shews the weekly railway station prices during the autumn season. Collection of these data is being continued, and the prices are now published regularly in the Weekly Return of Market Prices.

DEAD MEAT PRICES.

British Beef in 1907 was returned at from 1s. to 2s. per cwt. higher than in 1906, at the markets from which the Board regularly receive prices. The comparison of these records with those of the previous three years will be found in Table LXXI. American and Canadian port-killed beef rose by 3s. 6d. per cwt., while Argentine and American chilled beef also improved in value. Nearly all kinds of mutton dropped very slightly in value; the exceptions being first quality English mutton, which did not vary, and New Zealand, which rose by 2s. 6d. per cwt., thus returning to the same level as in 1905. Imported lamb made somewhat better prices. Pork, bacon, and hams generally showed a slight fall on the year, the only exceptions being first quality foreign pork, and American hams.

PRICES OF BUTTER.

The average price of first quality British Butter in 1907 was 13s. 9d. per 12 lbs, representing a decline of $\frac{1}{2}$ d. per lb from the average for 1906. The fall in price of all other sorts ranged from 2s. 6d. to 9s. per cwt., Russian, and, to a less degree, Australian, experiencing the greatest fall, and second qualities showing a tendency to depreciate to a greater extent than first.

PRICES OF FRUIT AND VEGETABLES.

Monthly average prices of fruit and vegetables have again been given, and an attempt has been made, for the first time, to arrive at a seasonal average of the prices of these commodities. Considerable difficulties present themselves in this connection, and the resultant figures can naturally not claim the same statistical accuracy as, for

instance, the grain prices or the value of imported produce, which are based upon the values of known quantities of the commodity sold. In addition, further complications are presented by this form of perishable produce, inasmuch as the bulk of it is placed on the market for a very short season, while the relatively very small proportion that can be produced and sold early fetches very high prices, the inclusion of which would materially and fallaciously increase the average. No endeavour has therefore been made to arrive at an annual price, but the prices obtained when each fruit or vegetable has been in season have been averaged, and the resultant "seasonal" average is shown on pp. 241-7. The definition of the "season" in itself presented difficulties and had necessarily to be determined somewhat arbitrarily. The figures used are those recorded week by week in the Board's Weekly Return of Market Prices. No prices, however, were utilised for the seasonal average unless the fruit or vegetable in question was quoted at three, at least, of the nine markets from which returns are furnished; and, in order to eliminate the forced produce, all prices were ignored which were more than twice the minimum returned for first quality, it being assumed that the price was high because the quantity was relatively small compared with the entire crop. The necessity of some such distinction is perhaps best realised by the consideration of such a crop as strawberries, which are on the market from May till August. In the former month of 1907 the average price for first quality British was about 3s. 4d. per lb., whereas when they were fully on the market they fell to below 3d. It is evident that a mere average of these extreme figures would give an entirely erroneous impression of the prices received generally by growers. While any particular value must be regarded as more or less approximate, it may nevertheless be regarded as sufficiently reliable to justify comparison of one year with another, and, in course of time, to exhibit the fluctuations in the prices during a series of years.

One exception has had to be made as regards prices of Channel Islands and French potatoes. These, in the earliest portion of the season, are usually sold by the pound, and later by the cwt., which renders their amalgamation somewhat misleading; moreover they form an exception to the usual rule of abundance being concomitant with cheapness. The bulk of these potatoes fetch comparatively high prices, which, as the season advances, are reduced in spite of the decreasing shipments, owing to the competition of home-grown varieties. No attempt has therefore been made to arrive at a "seasonal" average in their case. Reports published by the Royal Jersey Agricultural and Horticultural Society show that, in that island, prices of potatoes were lower in 1907 than in 1906, the weight exported during the season amounting to 77,800 tons, valued at £377,259, as compared with 51,932 tons, valued at £308,229, in the previous year. These indicate an average price, in Jersey, of £4 17s. and £5 19s. per ton in 1907 and 1906 respectively.

Averages have been formed in the same way for both 1906 and 1907, and the dates of the Weekly Returns used in each case are given in Table LXXVII. It is to be remembered that the dates there quoted are those of the publication of the Weekly Market Returns itself, and therefore the period during which the produce may be said to have been in season was in reality slightly earlier. Besides showing exactly what data have been utilised for calculating the averages, this Table is also of great interest as reflecting the different character of the

years 1906 and 1907. The general lateness and coolness of the latter year is clearly shown by the dates being mostly a fortnight later than in 1906, and also by the period covered being usually longer.

Comparing the season's prices themselves, the chief changes in vegetables are the higher prices of British potatoes, which mostly made from 20s. to 25s. per ton more than in 1906. Among fruit the chief item is the low price of plums: comparison with 1906 cannot be made, owing to differences in the method of recording the prices of this fruit in that year, but some idea of the fall may be gathered from its congener, damsons, which show an average only a fourth of that recorded in 1906. Practically all small fruit—currants, gooseberries, raspberries, and strawberries—appear to have been decidedly cheaper, as were also cherries, pears and imported apples, most British apples being, however, on the whole a little dearer. It may be added that the tables of monthly prices clearly indicate the advantage to be derived from placing fruit and vegetables on the market in advance of the main crop.

PRICES OF WOOL.

Prices of Wool showed some falling off from the high level attained in 1906, the difference generally amounting to about 2d. per lb., but varying according to the quality. Space has been found for a short serial Table (LXXX.) giving the prices of wool as struck by the Stewartry and Teviotdale Farmers' Clubs in each of the past ten years, with quinquennial averages, going back, in the case of the latter club, as far as 1876.

SUPPLIES OF LIVE STOCK.

The number of cattle, sheep, and pigs entering the fifty-one markets in Great Britain from which returns are now obtained, was as follows:—

Period.	Cattle.		Sheep.		Pigs.	
	Fat.	Store.	Fat.	Store.	Fat.	Store.
Jan.-March	275,104	159,029	817,484	206,008	171,057	47,491
April-June	275,374	270,916	1,051,119	510,465	145,517	66,540
July-Sept.	240,958	185,896	1,181,928	1,063,237	134,796	54,900
Oct.-Dec.	268,630	278,438	837,265	793,398	192,448	57,672
Year 1907	1,060,066	894,279	3,887,796	2,573,108	643,818	226,603
Year 1906	1,032,259	907,285	3,777,420	2,394,306	558,587	230,921

The total supplies for the year were thus greater in every case except store cattle, the increase in fat pigs being most noticeable.

Tables XCI. and XCII., on pp. 269 and 270, which show the number of fat and store cattle, and fat sheep and pigs, respectively, returned as weighed in the years 1906 and 1907, at the scheduled markets, and the percentage of the number weighed to the number entering, indicate that in England the use of the weighbridge for fat cattle slightly increased during the year 1907, more especially at King's Lynn and Shrewsbury.

IMPORTS OF AGRICULTURAL PRODUCE.

By the assistance of the Board of Customs detailed particulars of imports and exports of agricultural produce have been embodied in Sections IX. and X. The tables comprise comparative totals of imports for a series of years and particulars of receipts from each country, while the usual calculations of imports per head of population are given in Table CXXVII.

IMPORTS PER HEAD OF POPULATION.

The increased dependence of the population on imported food is concisely shown by a comparison of the quantity per head annually received for a series of years. Returns of imports have been collected on substantially the same basis for over fifty years, and by arranging the figures in septennial periods the gradual growth of supplies is clearly indicated. Thus in 1859-65 we imported 126 lbs. per head of Wheat and Flour, in 1866-72 the quantity had risen to 146 lbs., and in 1873-9 to 200 lbs. In the next septennial period the quantity per head was 239 lbs., rising to 256 lbs. in 1887-93, 273 lbs. in 1894-1900, and 294 lbs. in 1901-7. In the three last periods the total crop of wheat in this country fell from 112 lbs. per head in 1887-93 to 88 lbs. in 1894-1900, and 75 lbs. in 1901-7. Even assuming therefore that the whole of the home crop was actually available for food (which, in view of the requirements for seed and other purposes, is not the case) four-fifths of the wheat consumed in the United Kingdom is supplied from abroad. In the case of another important article of diet—Potatoes—the position is very different. The period of maximum imports was in 1873-9, when 23 lbs. per head were received, but in the following period the quantity fell to 13 lbs., and in 1887-93 to 8 lbs. Since then the imports of potatoes per head have risen to 13 lbs. in 1894-1900, and 18 lbs. in 1901-7, but the oversea supply still represents only a small fraction of the total consumption. The figures seem to indicate that potatoes may be regarded as forming a somewhat less important item in the national dietary than formerly. In 1887-93 the total crop of the United Kingdom amounted to 359 lbs., in 1894-1900 to 310 lbs., and in 1901-7 to 321 lbs. per head of the population. Comparing the first and last periods, and adding the imports and home crop together, it appears that the consumption of potatoes for all purposes has diminished by 28 lbs. per head as compared with 1887-93, though it is greater than in 1894-1900 by 16 lbs. The greatest relative increase in imported supplies appears in the case of meat. The imports of Beef and Veal have increased from 3.3 lbs. per head in 1859-65 to 22.6 lbs. per head in 1901-7. At the same time imported pigmeat (including in that term Bacon, Hams, Pork, &c.) increased from 4.2 lbs. to 19.9 lbs. per head. Mutton and Lamb imports have increased from 1 lb. in 1859-65 to 10.7 lbs. per head in 1901-7. Imports of Butter and Margarine have increased from 3.5 lbs. per head in 1859-65 to 13.3 lbs. in 1901-7, while those of Cheese increased from 2.7 lbs. in 1859-65 to 6.7 lbs. in 1901-7. The growth of the trade in imported Eggs appears most striking when measured in this way, the number per head of population having risen from only 8 in 1859-65 to 53 in 1901-7.

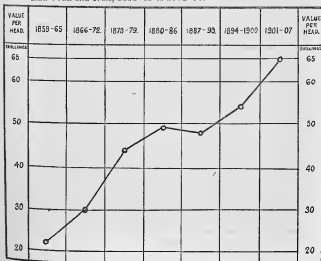

The value per head of imported food supplies is less reliable than the quantities as an index of the consumption, owing to the variations in the level of prices for the same article and also to the changes in the quality and consequently the market value of the commodities. There

is no doubt, for example, that the intrinsic value or "quality" of a given quantity of imported meat or butter is not only absolutely higher now than it was, say, forty years ago, but it is also relatively higher in comparison with the home produce with which it enters into competition. But comparison by values has the advantage of enabling articles which are measured by different denominations, and for which in some cases no quantities are returned, to be added together. It is thus possible to show the total expenditure per head of population on a number of commodities, bearing in mind that the values represent cost *ex ship* and do not therefore include inland carriage to market, cost of distribution, or profits after landing. The average values per head at the first, middle and last septennial periods for these articles were as follows:—

—	Wheat.		Meat.		Butter.		Cheese.		Eggs.		Fruit, Nuts and Vegetables.	
	s.	d.	s.	d.	s.	d.	s.	d.	s.	d.	s.	d.
1859-65	12	4	3	10	3	2	1	2	—	5	1	3
1880-86	20	10	13	10	6	7	2	8	1	6	3	8
1901-07	18	5	22	7	11	2	3	1	3	1	6	7

The total expenditure per head of population on these articles of imported food has thus risen from £1 2s. 2d. in 1859-65 to £3 4s. 11d. in 1901-7 and its steady increase is shown in the following diagram. The only check to the upward progression of the curve appears in the interval from 1880-6 to 1887-93, and this was due to a fall in prices rather than to a reduction in quantities imported.

C.—Average Value per head of Population of Imports of Wheat and Flour, Meat, Butter and Margarine, Cheese, Eggs, Potatoes and other Vegetables, Raw Fruit and Nuts, 1859-65 to 1901-07.

IMPORTS OF LIVE STOCK AND DEAD MEAT.

The arrested progress of imports of Live Animals for food, to which attention was drawn in the last Report, became a decline in 1907. Although there were 2,000 more live sheep imported than in 1906, the number of live cattle brought into the United Kingdom fell by 89,000 or nearly 16 per cent. below the figure for the preceding year. Imports from the United States dropped by 54,000 or 13·6 per cent., those from Canada by 35,000 or 22 per cent. On the other hand, there was an increase in the amount of Dead Meat brought into this country, the record quantity for 1906 being exceeded by 300,000 cwts. Among the separate kinds of meat, there were 200,000 cwts. more fresh beef imported, but a smaller amount of salted and preserved beef; imports of fresh mutton reached the record figure of 4,578,523 cwts., nearly 500,000 cwts. above the quantity for 1906. Against these increases there has to be set a deficiency in the imported supply of bacon and hams, the total receipt of pigmeat being less by over 200,000 cwts. The larger quantities of dead meat sent from British Possessions, particularly Australia and New Zealand, in 1907, more than compensated for the reduction in foreign supplies, due mainly to the decrease in the consignments from the United States. Imports of dead meat from Argentina were slightly less than in 1906, but larger quantities, chiefly of fresh beef and mutton, arrived from Uruguay. Supplies of bacon from Denmark were greater, but those from the United States were correspondingly smaller; whereas, in 1906, 50 per cent. of the bacon imported came from the United States, 26 per cent. from Denmark, and 21 per cent. from Canada, in 1907 42 per cent. came from the United States, 34 per cent. from Denmark, and 22 per cent. from Canada.

A reference to the quinquennial averages in Table XCVI. shows at a glance the increase in oversea supplies of meat during the past forty years. In 1861-5 the average annual importation of dead meat of all kinds was 1½ million cwts., and in 1901-5 it had risen to nearly 17½ millions, while in the year 1907 it amounted to 18½ million cwts. During the same period the number of live cattle imported increased from 174,000 in 1861-5 to 510,000 in 1901-5, but this was to some extent counterbalanced by a reduction in the number of live sheep and pigs imported. The enormous increase of the dead meat trade, with the comparatively small growth of the live stock trade, was no doubt in some degree stimulated in the earlier part of the period by the sanitary restrictions imposed in this country in consequence of the devastation of our flocks and herds by imported disease and the necessity of guarding against the recurrence of such risks. But in any case the desire to enter our markets on the part of the Australasian colonies and of other distant countries, from whence the transit of live animals was either impracticable or was inevitably attended by loss and cruelty to the animals themselves, promoted the rapid improvement of methods for conveying dead meat, even through the tropics, in a condition which now enables it to compete on almost equal terms with much of the meat killed in this country. To the development of this trade the resources of science and the ingenuity of inventors have greatly contributed, and the capital employed in it is now very great. It appears highly probable that the dead meat trade will continue in the future to increase year by year with the ever-growing requirements of our population while the oversea transit of live animals may be expected to diminish and eventually to disappear as a relic of an age of imperfect economic development.

IMPORTS OF DAIRY PRODUCE.

The total imports of Butter in 1907 were 210,508 tons, being slightly less than in the previous year, mainly in consequence of a serious reduction in the supplies from Canada and the United States. The deficiency was, however, largely made up by Denmark and Russia which increased their consignments to quantities larger than any previously recorded for those countries.

In 1907 there were 11,000 fewer tons of Margarine imported than in 1906; practically the whole of the decrease occurred among our imports of this commodity from the Netherlands. The United States contribution increased materially from a very few hundred cwts. in 1903-5 to over 200 tons in 1906 and 623 tons in 1907.

The total quantity of Cheese imported was less in 1907 than in any year since 1898, and over 13,000 tons less than in 1906. Larger quantities came from France, the Netherlands and New Zealand; and it may be noted that a few tons of cheese arrived from Australia, the bulk being from Queensland. Receipts from the United States were less than half of those of 1906 and over 11,000 tons less came from Canada.

Imports of Condensed Milk were in 1907 only slightly larger than in 1906. Larger quantities were brought from Belgium and the Netherlands, but imports from France, Germany, and Norway were correspondingly smaller. Only 156 cwts. of fresh milk, all from France, came in 1907, as against a total of 974 cwts. in 1906. The importations of cream dropped from 4,591 cwts. in 1906 to 4,231 cwts. in 1907. The receipts of "Milk preserved, other than condensed" have this year been distinguished as "separated" and "other than separated." Of separated milk 2,717 cwts. were sent from France, the only country supplying this item. Other kinds of "preserved milk" amounted to 4,258 cwts., practically all of which was imported from the Netherlands, Norway, and in less degree, Belgium. The two items together totalled 6,975 cwts., or 261 cwts. more than in 1906.

Altogether 2,228,148,000 Eggs were brought into this country in 1907. The countries from whence they chiefly came are shown in Table CXVIII to be Russia, Denmark, Germany, Belgium, and France. It may be assumed, however, that practically all the eggs received from Belgium, as well as about half the German, and some portion of those from France, and the Netherlands, are really of Austrian and Italian origin, while some Russian eggs are also shipped via Germany. As frequently noticed, the country of actual consignment of the goods imported is not always the same as the country of shipment, which is that recorded in these tables.

CORN IMPORTS.

Tables XCIX., and CXIX. show that in 1907 there were imported 97,168,000 cwts. of Wheat and 13,297,366 cwts. of Wheat flour, equivalent altogether to 115,636,564 cwts. of wheat and flour (expressed as wheat). These quantities represent an increase of over 4,000,000 cwts. of wheat as compared with 1906, with a decrease of nearly 900,000 cwts. of flour, so that the net augmentation of wheat, including flour, over 1906 was just under 3,000,000 cwts.

The chief imports of Corn from foreign countries and British Possessions respectively in 1907 were as under, the figures being given in thousands of cwts. :—

—	Foreign Countries.	British Possessions.	Total.
Wheat - - -	58,965	39,163	97,168
Barley - - -	17,647	1,980	19,627
Oats - - -	8,933	1,552	10,485
Maize - - -	50,439	2,941	53,380
Beans - - -	648	151	799
Peas - - -	793	452	1,245

The proportion of imports of wheat and flour sent to us by foreign countries was nearly 64 per cent. in 1907, the remainder coming from British Possessions, which thus sent a larger proportion (36 per cent.) than in 1906 (31 per cent.), though a little less than in 1904 and 1905. As a shipper of wheat, Argentina took first place, contributing nearly 23 per cent. of the total, the United States sending 21 per cent. and India nearly 19 per cent. Of flour, 70 per cent. came from the United States, nearly 14 per cent. from Canada, nearly 5 per cent. from France, and 3 per cent. from Austria-Hungary.

The chief features of the changes in the sources of our supply between 1906 and 1907, taking wheat and flour together, were increases of some 6,000,000 cwts. from India, 2,500,000 cwts. from Argentina, and something more than 1,000,000 cwts. from Canada.

The imported supply of Barley was slightly smaller in 1907 than in 1906, and in each of these years below the average. 32 per cent. of the imports in 1907 was received from Russia, 15 per cent. from Turkey, 14 per cent. from the United States, and 10 per cent. from Roumania. Algeria, Morocco, Tripoli and Tunis together contributed 2,724,000 cwts. as compared with an average of 750,000 cwts. for the preceding five years, while the supply from India, which averaged 23,400 cwts. for the years 1902-6, rose in 1907 to 1,227,000 cwts. During the last five years imports from Austria-Hungary, Denmark, Egypt, Germany, and the Netherlands have declined and the receipts from Russia though still considerable were in 1907 about one half what they were in 1903 and 1904, while imports from Chile fell from the 336,700 cwts. in 1906 to 8,100 cwts. in 1907.

The imports of Oats in 1907 were smaller than in any year since 1881. Receipts from Argentina showed an increase from 400,000 cwts. in 1906 to 1,646,000 cwts. in 1907, but those from Russia and the United States declined heavily; in the former case from 6,709,000 cwts. to 3,068,000 cwts., and in the latter from 3,375,000 cwts. to 246,000 cwts. The supply from British possessions amounted to 15 per cent. of the total, Canada contributing nearly the whole.

Of the total imports of Maize in 1907, 2,941,000 cwts. came from within the British Empire, Canada's contribution being 2,359,000 cwts. The premier position among the foreign countries which supply the British market has been occupied since 1902 by Argentina, which in 1907 contributed 33 per cent. of the total imports; the United States sending 28 per cent., Roumania 19 per cent., and Russia 12·5 per cent.

Importations of bran and pollard, sharps and middlings, and other offals of corn and grain amounted in 1907 to 568,952 cwts., being 290,884 cwts. less than in 1906, due mainly to smaller supplies of sharps and middlings.

OTHER AGRICULTURAL IMPORTS.

Oversea supplies of Wool in 1907 exceeded those for 1906 by 119,000,000 lbs. and amounted altogether to 764,000,000 lbs.; re-exports reached nearly 314,000,000 lbs. The total quantity imported is the highest since 1895 when 775,000,000 lbs. were received, and the excess of imports, 450,000,000 lbs., is the greatest quantity yet recorded. Considerably increased supplies came from Argentina, but the bulk of the increased imports arrived from Australia, New Zealand, and South Africa. Imports from Australia have now practically reached the figure at which they stood prior to 1902 and 1903, while those from Natal and the Cape have now regained the level of 1898 and 1899. The proportion of wool imported from foreign countries was in 1907, 18·6 per cent, and in 1906, 20·1 per cent.

The total amount of Hay imported in 1907 was 97,424 tons, this being nearly 60,000 tons less than in 1906. The smaller supplies are entirely accounted for by the reduction of imports from the United States from some 30,000 tons in 1906, to 3,500 tons in 1907, and from Canada from 57,000 tons to 16,000 tons. Imports of straw show a reduction from 78,500 tons to 58,700 tons.

From Table CII. it will be seen that in 1907, the importations of apples, oranges and grapes, were considerably higher than in 1906, while the quantity of imported plums (326,000 cwts.) was 565,000 cwts. less than in 1906, and 137,000 cwts. below the average of the years 1900-4. To the increase (717,500 cwts.) in the quantity of imported apples, Canada contributed 590,000 cwts. and Tasmania 112,000 cwts.

Tables CII. and CXXII. also show the quantities of raw vegetables imported in 1907 and a series of years previously. Imports of potatoes were much more than in 1905 and 1906, but were still below the quantities received in 1903 and 1904. In all, some 8,250,000 cwts. were sent to this country, of which about 3,000,000 cwts. came from France, nearly 2,000,000 cwts. from the Channel Islands, and 1,290,000 cwts. from the Netherlands. Of the 1,135,499 cwts. of tomatoes which were imported in 1907, the Canary Islands were responsible for about one half, the Channel Islands for one-fifth, Spain for one-seventh, and France for over one-tenth.

Three new Tables (CXXIV, CXXV, and CXXVI) have been added in this section, showing the sources of supply of foreign Hops, Molasses used for cattle food, and Manures respectively. The first of these shows that the amount of Hops imported (rather more than half the supply coming from the United States) was somewhat less in 1907 than in 1906. The quantity of molasses imported for cattle-food continued to grow, and just under a million tons were so declared last year. The principal source of supply is the United States, other contributing countries being Cuba, Egypt, and to a smaller extent Java. As regards manures, bones come from a variety of sources, but chiefly from India and the Argentine Republic; guano from Peru, nitrate of soda from Chile, phosphate of lime and rock phosphate from North Africa and the United States, while the unenumerated (which would include kainit and other potash manures) are imported chiefly from Germany.

AGRICULTURAL EXPORTS.

Exports of live stock, which in 1906 were of a record character, declined slightly in 1907, but were still larger than the average of the five years 1901-5. The following table compares the number and value of British and Irish live stock exported last year with those for 1906, and the yearly average of the five preceding years.

—	1907.			1906.			Average 1901-5.		
	No.	Total Value.	Average Value per Head.	No.	Total Value.	Average Value per Head.	No.	Total Value.	Average Value per Head.

Argentina, the United States, Uruguay, Canada, and Australia were the best customers for cattle, and Argentina, Canada, Uruguay, Germany, the United States, Roumania, Australia, Chile, New Zealand, France, and Spain were the principal buyers of sheep. Three-fourths of the 1,548 British stallions exported went to Canada, the United States, and Argentina.

In 1907, nearly 344,000,000 lbs. of wool were exported from the United Kingdom, but of this quantity less than one-tenth, was produced here. The chief countries taking British wool were the United States, Russia, Germany, and Canada.

I have the honour to be, Sir,

Your obedient Servant,

R. H. REW.

June 30th, 1908.

Section V.

PRICES

OF

WHEAT, BARLEY, and OATS

AND OF

BREAD.
